

SCW 1590 Series: High Power 1550nm DFB Laser Modules for CW Applications

ISO 9001:2008 Certified

- Wavelengths: All C & L Band DWDM from 1530nm to 1610nm
- Optical Power (CW) Up to 20 mW
- Optional Optical Isolator
- Typical Applications:
 - DWDM
 - Sensors
 - Seed Lasers
- Packaging
 - 14 PIN Butterfly or DIL with TEC
- RoHS Compliant

The SCW 1590 series laser diode module is a 20mW 1550nm DFB laser diode packaged in a 14 pin butterfly or DIL. The laser diode is optically coupled and aligned to a Panda PM fiber pigtail and includes a back facet monitor detector, thermoelectric cooler and an electrically isolated temperature sensing thermistor. An optical isolator is optional. Multiple connector choices are available for the PM pigtail termination and the connector can be aligned to either the fast axis or slow axis. As an option, the laser can be packaged into a 3 pin coax package but will not include a TEC or a thermistor. The output power from a coax package will be limited to 10mW. Please consult LDI regarding the coax option.

Characteristics: $T_{amb} = -30^{\circ}$ to 70° C (cooled package only); $T_{id} = +25^{\circ}$ C

PARAMETERS	SYMBOL	CONDITIONS	Min	Typ	Max	Units
Optical Power (Fiber)	P_o	$T_{id} = 25^{\circ}$ C	20			mW
Threshold Current	I_{th}	$T_{id} = 25^{\circ}$ C		14	20	mA
Drive Current	I_f	$T_{id} = 25^{\circ}$ C, $P_o = 20$ mW		150		mA

Personal Hazard and Handling Precautions:

Handle optical fiber with normal care, avoiding stretch, tension, twist, kink or bend abuse. ESD precautions apply. Normal aversion reactions will protect from radiation hazards to the eye associated with devices of this kind.

IEC Class 3R lasers when operated at rated conditions.
